CARE AND MAINTENANCE BOOKLET

CARE & MAINTENANCE

- As with any quality vinyl wall tiles, proper care and maintenance will extend the life of the vinyl wall tiles and help maintain its original finish.
- Ordinary dirt spots may be removed with a mild soap and warm water. Clean from the bottom of the wall upward to protect the baseboard and prevent streaking. Rinse thoroughly with clean water from the top down using a sponge. Blot vinyl wall tiles dry with a soft, lint-free towel. Try a small subtle spot first before attempting the entire wall.
- Abrasive cleaners are not recommended for cleaning the vinyl wall tiles as they may mar the surface.
- Do not use active solvent-based cleaning agents, lacquer thinners, nail polish remover, pine oil or cleaning agents containing bleach as they will remove the print and/or finish from the vinyl wall tiles.
- Use door stops, knob protectors, or door knob covers to prevent damage from doors banging against the wall.
- Every 6 months, check all silicone adhesive grout lines and repair if necessary.
- Vinyl tiles can show signs of fading in some applications. To bring tiles back to its original sheen, vinyl floor polish can be applied.

Reminders!

1. Retain your Evorich Flooring sales receipt.
2. Keep records of the style and run number of your evoWALLS™. This appears on the outside of the carton alongside the barcode.
